Title: GenEco – Generative AI for Sustainable Living

Subtitle: Generating Eco-awareness through Simulation

Theme: Sustainability & Climate Action

USING GENERATIVE AI TO HELP PEOPLE VISUALIZE AND EMOTIONALLY UNDERSTAND THE REAL IMPACTS OF CLIMATE CHANGE.

TEAM NAME: GenEco Innovators

TEAM: Nandha Gopal R[team leader] |Adhish Kumar T | Shobika S | Sakthi R

Institution: Prince Dr. K. Vasudevan College of Engineering & Technology

Why Climate Awareness Isn't Enough?

✓ People read about climate change but don't emotionally understand it.

✓ Awareness campaigns are mostly static – just graphs and data.

✓ There's a big gap between knowing the facts and feeling the impact.

The Real Challenge

How can we use Generative AI to help people see, understand, and emotionally connect with climate change impacts?

- ✅ Climate data is complex and disconnected from real life.
- ✅ Current tools only show numbers, not experiences.
- ✅ People can't relate their personal actions to global effects.

This creates awareness without understanding — and understanding without action.

What is GenEco?

Core Modules:

- AI Awareness Campaigns - Personalized posters, reels, memes.

- Sustainable Product Designs - AI-generated 3D eco-product mockups.

- Climate Change Simulations - "What-if" visual scenarios for cities.

- Eco-Living Storytelling - Turns user eco-actions into comics & videos.

Implementation Plan

Module	Technology Used
Awareness	GPT / Canva AI / NLP
Product Design	Stable Diffusion / SmartMockups / Blender
Simulations	JavaScript + D3.js / AI visualization
Storytelling	Synthesia / Runway ML / Canva Video

Tech Stack:

HTML · Tailwind CSS · JavaScript · AI APIs · Cloud (Vercel)

💬 GenEco combines AI creativity with real-world visualization for sustainability.

Prototype & AI Outputs

- 🖼️ AI Awareness Poster Example:

- "Switch off lights, switch on the future." (Add your Canva poster image)

- 🧴 Eco Product Design:

- 3D Bamboo Water Bottle mockup with GenEco logo.

- 🏙️ Climate Simulation Snapshot:

- Before vs After (polluted vs green city).

- 🎬 Eco Storytelling Video:

- AI-generated short clip showing a community's eco-action impact.

💬 These outputs show how GenEco connects creativity, technology, and awareness.

Why GenEco Matters

| Focus Area	Impact
🌍 Global Awareness	AI spreads sustainability messages faster & wider
⚙️ Eco-Innovation	AI reduces time & cost for product R&D
🏛️ Policy Support	Simulations help governments make informed decisions
🎓 Youth Engagement	Gamified eco-stories engage Gen Z
💰 Green Economy	Encourages sustainable brands & circular markets

💬 GenEco turns awareness into action and creativity into impact.

Sustainability Made Visual

💬 GenEco transforms climate awareness into emotional, visual, and actionable experiences using Generative AI.

Next Steps:

✓ Develop complete web application with AI APIs.

✓ Expand multilingual eco-awareness campaigns.

✓ Collaborate with schools, NGOs, and brands for real-world impact.

🌱 **We believe GenEco will make sustainability something people don't just understand – but truly experience.**
